Hardware Stores

Clothing Retailers

Services

Gyms

Hairdressers/Salons

Spas

Hospitality

Restaurants

Bars

Nightclubs

Cafes

Pubs

Canteens

Takeaways

Return On Investment

Reduce Admin Hours

Automated reporting and faster stock-taking means Epos Now customers save an average of 5 hours a week on admin, after their initial implementation.

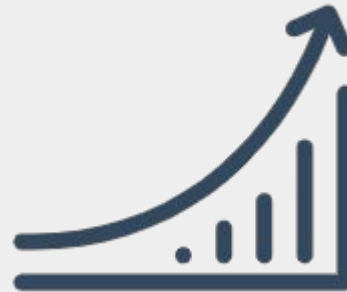

Remote Management

Being able to access and manage the software from anywhere massively increases productivity. Don't need to physically go to store to have that same amount of control but have access to all information in the palm of their hand.

Employee Management & Security

According to the University of Florida theft is 2% of revenue for businesses in the SME space., 43% of this theft is by employees. Full audit-controls and reporting, with secure staff access reduces this by half.

Upselling & Cross Selling

Automatic pop ups alerting staff to available upsells and cross-sells, together with staff coaching, improve the average order size by 7%.
